DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of species IX, Figures 19-22 in the reply filed on April 27, 2006 is acknowledged. The traversal is on the ground(s) that search and examination can be made without serious burden. This is not found persuasive because the non-elected claims would require a different field of search with respect to features not common to each species. Where it is necessary to search for one of the inventions in a manner that is not likely to result in finding art pertinent to the other invention(s) (e.g., searching different classes /subclasses or electronic resources, or employing different search queries, a different field of search is shown, even though the two are classified together. See MPEP § 808.02.

The requirement is still deemed proper and is therefore made FINAL.

Claims 5-10 and 16 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 11-15 and 17-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 11 is rendered indefinite by the alternative "and/or" since it would appear that the cylinder could not be in the compression stroke and the expansion stroke at the same time.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 11-15 and 17-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Kurokawa et al (JP 11-107891). The control apparatus controls combustion of the engine at a time of stopping the engine and controls inertia energy of the engine with a motor so as to stop the engine at a predetermined crank angle position as set forth in the English abstract. Regarding claim 11, see paragraphs [0046] to [0050] of the translation.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
